Gent June 2006

Leuven October 2006

Advantages of being a member

- Well informed of the newest soil related topics
- Relation with ISG: knows what the needs and wishes are of the industry (“polluters”)
- Translation of national documents, bring national documents in an European context
- SPG is the antenna for NICOLE for new developments
- Through the SPG of NICOLE new technologies/ concepts can be brought quickly to the market
- NICOLE as a brand name

Mission

The Service Providers sub-group of NICOLE is a network for open communication of knowledge and information on the practical implementation of innovative ideas and technologies, for the management of industrially contaminated land. The SPG provides the opportunity for Europe-wide collaboration and cooperation, to ensure synergy in the delivery of cost-effective, quality assured and sustainable solutions.
