

**NICOLE**

Network for Industrially Co-ordinated Sustainable Land Management in Europe

## **Call for academic research partners and start-up companies to participate in a Project Matching Session on Nature Based Remediation**

*At the NICOLE Spring Workshop 2018 Frankfurt  
20-22 June 2018, at Infracerv Höchst, in the Höchst Industry Park in Frankfurt.*

The upcoming workshop of the Network for Industrially Co-ordinated Sustainable Land Management in Europe (NICOLE) will focus on Sustainable Nature Based Remediation opportunities. NICOLE has the pleasure of inviting international stakeholders and experts to take part in the 2018 Frankfurt Workshop.

The workshop organising committee are looking to include a session at the workshop where universities, academic institutes and start-up companies are invited to match their research projects related to nature based remediation with appropriate real-world industrially impacted sites that may be offered by our industrial and consulting members for a pilot. The research project can relate to one or more themes of the workshop or another aspect of nature based remediation where the research has advanced to a point where via a pilot, access to a project site would be beneficial.

The main themes of the Workshop are outlined in the [call for abstracts](#) for the workshop

### **PROPOSAL GUIDELINES**

Universities, academic institutes and start-up companies who have potential projects to offer are invited to provide a 1-page summary outlining the area of research, the objectives and scope of future site related work. The summaries should also indicate the aspects required of the project-site and the types of access or site materials required for the anticipated project.

Our intention is to share the summaries with the Innovation Working Group, a group of industrial, consulting and academic members in advance of the workshop. The Working Group will make a selection based on potential interest of NICOLE members. Selected parties will be notified by 1 May 2018.

Selected projects will be given exposure via the session in the Workshop, articles in the NICOLE newsletters and the NICOLE website.

Summaries should be sent by **15 April 2018** to the NICOLE Secretariat, email: [nan.su@nicole.org](mailto:nan.su@nicole.org)

The matching session and workshop will take place at Infracerv Höchst in the Höchst Industry Park in Frankfurt.

If you have further questions, please send them by email to: [nan.su@nicole.org](mailto:nan.su@nicole.org)
